

GREAT NORTHERN ENGINEERING

Project History

Project Title: Denali Bluffs & Grande Denali Hotel Upgrades

Client: Denali Properties

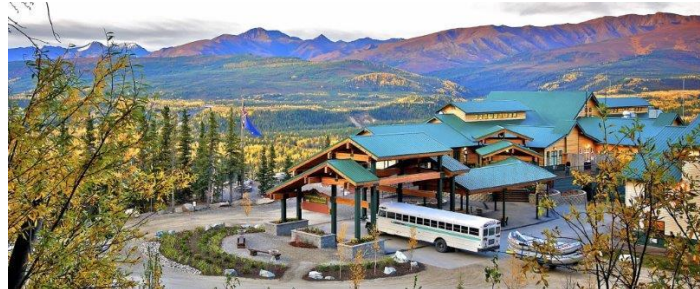

Location: Denali National Park and Preserve

Project Scope:

Great Northern Engineering was contracted by Denali Properties to design and supervise the installation of several property upgrades to the Denali Bluffs & Grande Denali Hotels.

Project Details:

- GNE engineered foundation leveling plans for several of the existing buildings and supervised the subsequent field work.
- GNE completed a Code Analysis for the existing facility.
- GNE completed architectural and structural plans for extensive upgrades to the Denali Bluffs and Mountaineer Grill including new landscaping, walkways, paths, railings, boardwalks, and room verandas.
- GNE completed the design for ADA compliance upgrades.
- GNE assisted with the design for the Perky Moose restaurant and common area upgrades including structural modifications, a new private dining room, and exterior dining deck.
- GNE completed the design for the deck and boardwalk ties to the Denali Riverview at the Bluffs Hotel – Phase I.
